Mission

To become a reliable provider of pharmaceutical and animal health products to all our customers in all the market places that we operate in.

Aspiration

We want to be recognized for providing quality pharmaceutical products manufactured with highest quality of processes, practices and cutting edge technologies.

We deeply commit ourselves to ensure superior value is provided to our customers by being focused and innovative.

We also strive to provide a workplace where learning, effectiveness and creativity is encouraged. We aspire to achieve continuous improvement in our performance in addition to contributing to the society through our economic contribution and social benefits of our products.

Accolades

National Award

Sterling Lab has been honoured with several accolades, most prominent amongst which has been the **National Award** presented to Mr. Jayant Surana for outstanding SSI Entrepreneur honoured by the Government of India.

Company Overview

Founded in 1989 Sterling lab is a leading Pharmaceutical and Animal health products manufacturer located at Bangalore, India. Since its inception Sterling Lab has always been a Company focused on improving human health by innovation. With world class facilities, which are approved by major governmental authorities of different countries, Sterling Lab manufactures a comprehensive range of medical and veterinary pharmaceuticals, contract manufactured products for national and International markets.

Sterling Lab has risen to prominence in the areas of contract manufacturing, marketing and exports to nearly 15 countries. The dedicated team working continuously has been instrumental in bringing about this objective to reality.

The state of the art ISO-9001 WHO-GMP certified plant offers a wide portfolio of products of different segments such as Antibiotics, Antibacterials, Antidiabetics, Analgesics, antiinflammatory drugs, Antimalarials, Cardiovasculars, Cough and Cold preparations, Dermatologicals and Antifungals.

Sterling Lab manufactures and markets pharmaceuticals and veterinary products and provides services that make a warmest care and significant difference to patients, animals, medical professionals and the society.

Contract Manufacturing Export

The partner you can rely up on:

Sterling Lab is a reliable source of providing quality pharmaceutical products to a number of companies. Given our modern and sophisticated multipurpose facilities we can develop and manufacture tailor made, just-in-time orders under strict confidentiality and exclusive arrangements. The customer satisfaction is reflected in the long term association and continued loyalty that we enjoy from our extensive client base over the years.

We have a satisfied list of clients whose product range is manufactured continuously in our facilities.

We are manufacturing different formulations like Capsules, Tablets, Powders, Creams, Liquids and Suspensions.

We have a separate facility for liquids which can manufacture 3 million units per shift per month.

Located in Hosur and Pondicherry, Sterling Lab exports to nearly 15 countries. Its manufacturing sites are conveniently located to International airports and shipping facilities which allow immediate access to International markets.

Our plants have been audited by many countries by their respective regulatory authorities. Sterling lab is also actively involved in the in-licensing for different products of International Companies.

Sterling Lab exports apart from our own brands, other brands as per the importers specification in English, Spanish and French.

Operations

Sterling Lab has invested and boasts of state of the art manufacturing facilities located at Hosur, TN, India with a built up area of 1,00,000 Sq ft.

The plant is equipped with sophisticated HVAC system and RO water treatment plant. Separate areas have been earmarked for Betalactum and Non Beta-Lactum products.

Our production capabilities and expertise in finished formulations are exemplified by its wide range of application oriented dosage forms and packages. These include customer specified preparations as well.

Our capacities of various dosage forms are as follows:

- Tablets : 150 million units per shift per month.
- Capsules : 50 million units per shift per month.
- Liquids/Suspensions : 3 million units per shift per month.
- Powders : 1 million units per shift per month.
- Ointments : 0.3 million units per shift per month.

We have installed an integrated effluent treatment and disposal system conforming to the norms of the Pollution Control Board in order to have a clear eco system.

Human Resources

Understanding that Human Resource is the most important asset of any company, Sterling Lab continuously works on the development of this asset.

Sterling Lab creates an environment encouraging development of people in order to help them to be highly motivated, proficient and proactive in their respective areas by bringing in advanced HR management concepts, such as Balanced Score Card, KPI etc. Every team and employee has an updated business and competency targets and receives timely feed back on performance against their targets. The Human Resources Management focuses on personal career development, which encourages people to reflect on their own experience of being mentored or of mentoring others.

Sterling lab attracts many professional and experienced personnel in the areas of production, research and development, quality control, marketing, finance and administration.

We emphasise and carry out regular training pertaining to the job responsibilities and personality development.

Marketing & Sales

Sterling Lab is committed to support healthcare professionals in meeting the increased challenges and demands of to-day's healthcare environment. It has 200 representatives and nation wide distribution channels who promote and distribute our Pharmaceutical and veterinary products across the country.

Sterling lab focuses on programs that are innovative, sustainable and bring real benefits to those most in need. It actively participates in health and education programs and partnerships that aim to bring sustainable improvements to under-served patients.

Sterling Lab believes all these activities could create value for customers and as whole a better healthier environment.

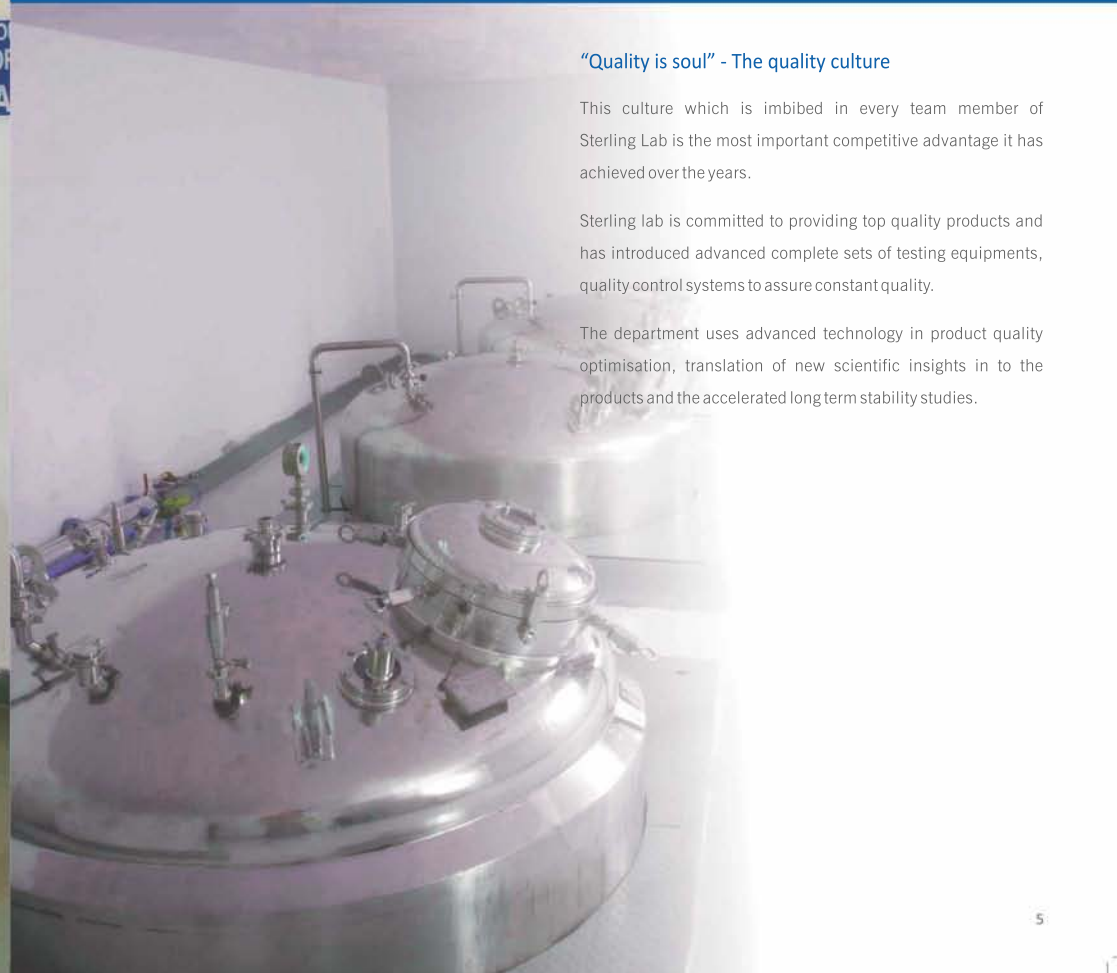

Research and Quality Assurance

“Quality is soul” - The quality culture

This culture which is imbibed in every team member of Sterling Lab is the most important competitive advantage it has achieved over the years.

Sterling lab is committed to providing top quality products and has introduced advanced complete sets of testing equipments, quality control systems to assure constant quality.

The department uses advanced technology in product quality optimisation, translation of new scientific insights in to the products and the accelerated long term stability studies.

Research and Quality Assurance

Every stage of the production goes through stringent on line quality control checks as per the set Standard Operating Procedure.

The quality assurance department checks the finished products before the release to the market and stability tests are conducted at regular intervals and documented as per the set norms.

The Sterling "quality culture" has ensured that approval by the world's most rigorous regulatory systems as well as by auditors of the major Global Health care companies is achieved on a regular basis.
